

EQM's Capabilities

EQM is a full-service environmental consulting, engineering, and remediation firm. In addition to our corporate headquarters in Cincinnati, EQM has eight offices located throughout the United States.

Our Environmental, Health, and Safety (EHS) auditing and compliance division consists of professionals with more than 20 years of experience. We offer auditing consulting services for commercial, industrial, institutional, and government facilities.

Our professionals have the onsite experience and professional training to evaluate and provide feasible solutions to an organization's EHS compliance requirements. EQM professionals work with clients to develop site-specific and organization-wide systems to establish and maintain an internal culture of compliance.

Our EHS auditing team assists clients in the evaluation of their current compliance and conformance status and identifies potential liabilities and associated risks. EQM professionals focus on identifying areas of non-compliance and/or the need for best management practices and recommend viable and cost-effective solutions or alternatives.

Servicing Multiple Industries
