## **ASRC Industrial Services Acquires Environmental Quality Management**

*AIS Continues to Expand Capabilities and Presence in the Midwest*

**Concord, Calif. (July 1, 2019)** – [ASRC Industrial Services](#) (“AIS”), a premier provider of industrial and environmental services throughout the continental United States, has announced the acquisition of Environmental Quality Management (“EQM”). The company is headquartered in Cincinnati, Ohio, and provides services throughout the United States, including the Midwest, Pacific Northwest and California. EQM is a full service environmental remediation company and will join AIS’s Environmental Engineering and Professional Services (“EEPS”) operating group.

Founded in 1990, EQM specializes in providing environmental remediation, emergency response, site restoration, environmental consulting, and emission measurement services. The company serves a variety of end markets, focusing in the public sector (EPA, US Army Corps of Engineers, Department of Defense), steel industry, and manufacturing.

“It’s a privilege to welcome the talented management team and workforce of Environmental Quality Management to the AIS family of companies,” said Greg Johnson, President and CEO of AIS. “The addition of EQM to the AIS family immediately enhances our enterprise-wide capabilities, increases our presence in key markets and ultimately brings us one step closer to achieving our vision of building an enduring, employee-centric, customer-focused industrial services provider.”

“We are extremely excited about the opportunities joining AIS brings to both our employees and our customers,” said Jack Greber, Founder of EQM. “After getting to know the AIS team and learning about ASRC’s commitment to the industrial services market, I knew AIS was the right long-term home for Environmental Quality Management.”

### **About ASRC Industrial Services**

Headquartered in Concord, California, ASRC Industrial Services is a wholly-owned subsidiary of [Arctic Slope Regional Corporation](#) ("ASRC"). AIS is organized within three capabilities-based operating groups: Construction, Maintenance and Repair; Remediation and Response Services; and Environmental Engineering and Professional Services.
