

When it Rains, it Drains!

- Missed storm events? Can't sample within 30 minutes of discharge?
- Tired of getting wet?
- Tired of waiting for the rain?
- Increased monitoring frequency?
- Need help with your permit-required stormwater monitoring?

EQM's Stormwater Monitoring Team can address your individual sampling needs and help you fulfill your permit's sampling and analytical requirements.

EQM's Stormwater Monitoring Team

Our experienced and trained personnel offer:

- Reliability and expertise in collecting stormwater samples that are in compliance with NPDES Individual and Multi-Sector General Permits
- State-of-the-art stormwater monitoring equipment and storm tracking methods
- Proven track record of efficient and reliable stormwater monitoring, storm event documentation, and data reporting while minimizing false alarms
- Multiple TWIC personnel
- Visual and Qualitative Monitoring Expertise

- Multiple personnel trained in low level mercury "clean hands, dirty hands" sampling technique
- Proven experience: EQM staff has been collecting stormwater samples since 1991 and has completed more than 250 stormwater monitoring projects
- EQM has an effective range of 100 miles from Cincinnati
- EQM can train your staff to perform monitoring
- EQM develops stormwater monitoring protocols to guide our clients in the collection of samples
